

Members of the ACWA Board of Directors gather at the State Capitol in late January, when they held their first full workshop and meeting of the 2026-'27 term. The Board received a briefing on ACWA's latest initiative, see article below, and heard updates on policy, regulatory and organizational priorities going into 2026. See Page 3 for article summarizing the Jan. 30 meeting.

ACWA Launches Vision for Our Water Future Policy Initiative

ACWA has launched a new policy initiative to elevate water-related priorities with California's gubernatorial candidates, legislative leadership and administration officials in advance of a new governor taking office in 2027.

The Vision for Our Water Future initiative will focus on integrating members' unified priorities into campaign platforms and further establishing the association as a leading voice in shaping California's water future. These priorities will reflect an alignment of ACWA strategic priorities and region and committee workplans.

ACWA is currently holding a series of regional briefings to update members

on the initiative and to gather critical regional input to help shape the priorities and solutions that should be represented.

Once the policy document is developed, members will be called upon to amplify the vision and reach key decision-makers. Read more about the effort on the ACWA website at acwa.com/vision. Interim Executive Director Marwan Khalifa also discusses the new initiative in his column on Page 2. ♦

ACWA Sponsoring Bills to Improve Wildfire Policy, Protect Water Agencies

ACWA's State Legislative Committee in January voted to sponsor one bill and co-sponsor a second bill, both of which aim to improve state wildfire policy in ways that protect water agencies and benefit Californians overall.

Wildfire Liability

ACWA Interim Executive Director
MARWAN KHALIFA

New ACWA Initiative Will Amplify Members' Voice and Vision

California voters will hear a lot from candidates vying to replace Gavin Newsom for governor between now and Nov. 3. So far, the candidates are focusing on housing, affordability, jobs and the economy, and ACWA is launching the Vision for Our Water Future initiative to ensure they also start talking about water.

To make sure we get that point across, ACWA is reaching out directly to the candidates to elevate water as a top policy priority and ensure the unified priorities of ACWA's diverse membership are reflected in the next administration's agenda. Through this work, ACWA is positioning itself as a trusted thought leader and essential partner to the future governor.

Having worked at the agency level and now within ACWA itself, seeing this potentially historic effort take shape counts as one of the most exciting periods in my career in California water. This is yet another example of ACWA manifesting itself as a world-class organization, capable of seizing an opportunity and guiding the state toward an inflection point in water policy. And it is another, among many examples, of our association's ability to channel the energy of our members into outcomes that will benefit every Californian.

ACWA is implementing this initiative through a structured, member-driven process that brings together staff, member agencies and key partners. The initiative

will culminate in a concise policy document outlining a focused set of strategic priorities and recommended actions to support a secure, reliable and resilient water future for California.

Demonstrating our expertise can reflect and strengthen the trust placed in us as stewards of our state's most precious resource. This policy document will do that by building on a long history of ACWA leadership through policy documents such as "No Time to Waste: Blueprint for California Water" (2005) and our "Statewide Water Action Plan" (2013).

The input for building this initiative started coming together during several opportunities last year. This included a member survey that provided feedback on advocacy priorities and a roundtable discussion at fall conference

That development process continues through regional member briefing sessions, region board meetings and committee meetings. These virtual sessions provide another opportunity to refine this critical policy document.

As California enters this pivotal election cycle, ACWA's role is clear: to ensure water is treated as a priority issue and recognized as the foundation for the state's economic vitality, environmental stewardship and quality of life. ♡

ACWA Continues Search for Executive Director

ACWA continues its nationwide recruitment process for hiring an Executive Director to lead the association's day-to-day management.

The ACWA Board of Directors in late 2025 selected Bob Murray & Associates to lead the recruitment process and posted the job announcement in January.

Candidates have a March 8 deadline to submit applications.

In the meantime, Marwan Khalifa continues to serve as Interim Executive Director, a position he has held since early 2025. Khalifa previously worked as Chief Financial Officer and District Treasurer for Mesa Water District, also serving on the

ACWA Board, Executive Committee and as Chair of ACWA's Finance Committee.

Last year, the Board conducted a nationwide search to identify potential candidates for the role. Following a thorough and thoughtful review, the Board determined that additional time would best serve the association's long-term interests. ♦

New ACWA Board Kicks off 2026-'27 Term

ACWA's new Board of Directors for the 2026-'27 term tackled a full agenda during its first meeting of the year on Jan. 30. The meeting included a presentation highlighting the results of ACWA's member engagement survey, selecting venues for the 2029 fall and spring conferences and hearing updates on state and federal advocacy.

The Board participated in a half-day workshop the day prior that focused on ACWA's new policy initiative — Vision for Our Water Future. (See Page 1 article for more details and Interim Executive Director Marwan Khalifa's column on Page 2.)

Member Survey

The independent firm FM3 Research interviewed 178 individuals with member

agencies throughout the state between Oct. 6 and Nov. 18 last year. Members remain overwhelmingly satisfied with ACWA's performance in serving their needs, with the percentage of surveyed members totally satisfied ticking up from 89% during the last survey in 2022, to 91% in 2025, according to the survey.

Conference Venues

Board members received an overview of options for hosting ACWA's two 2029 conferences and approved the Monterey Conference Center for the Spring Conference and the Palm Springs Convention Center for that year's Fall Conference.

Advocacy

Board members heard updates on state and federal advocacy. On the state side,

updates included details on ACWA's work to sponsor two bills related to wildfire policy and support for the Healthy Rivers and Landscapes Program.

A federal update reviewed ACWA's Washington D.C.-based advocacy in support of multiple congressional bills to secure and maintain water-related funding.

California Farm Water Coalition

California Farm Water Coalition Executive Director Mike Wade delivered a presentation updating continued educational outreach through the Cultivate Coalition campaign. In 2025, ACWA's sponsorship was \$75,000 to help the campaign expand its reach through social media videos and partnerships with social media influencers. ♦

SPRING 2026 AWARDS

Apply at acwa.com/awards
Deadline March 2

From page 1 | *Capitol Corner*

What it would do: ACWA is sponsoring wildfire-related legislation to clarify and declare the limited role of public water systems during wildfires. While water systems support firefighting, they are not designed or intended for wildfire defense or suppression, and it would be impractical and costly to require them to function as such. The bill proposal would establish that water supply or pressure limitations during a wildfire are not a substantial cause of wildfire damages and that wildfire spread is not an inherent risk of water system design. It also would require certain urban water suppliers in high fire-risk areas to include wildfire-specific response procedures in their emergency response plans.

Status: The bill is awaiting introduction in the Senate.

Wildfire Impacts

Author: Senator Shannon Grove (D-Bakersfield)

What it would do: SB 899 would require the California Wildfire and Forest Resilience Task Force, created by Gov. Gavin Newsom, to assess the health costs and impacts of high-severity wildfire smoke to better value the importance of investing in achieving the Task Force's Action Plan goals. ACWA is co-sponsoring the bill with the California Forest Watershed Alliance.

Status: The bill is currently in the Senate.

Prop 4

Author: Assemblymember David Alvarez (D-San Diego)

ACWA Position: Support

What it would do: AB 35 would exempt Proposition 4 spending from the regulatory process. A full exemption would enable funds to be deployed more quickly and efficiently, ensuring that protracted administrative processes do not hold up vital projects. An exemption from the Administrative Procedure Act would not eliminate transparency, consultation or public engagement, but would instead streamline implementation, maintain consistency across programs and avoid creating barriers to delivering critical funding where it is most needed.

Status: The bill passed the Assembly in January and is moving through the Senate. ♦

THIS MONTH IN ACWA HISTORY

10 years ago

In the face of ongoing drought conditions, the State Water Resources Control Board adopted an emergency conservation regulation that extended an original regulation through October, with a few limited adjustments to reflect climate, growth and development of some drought-resilient potable water supplies since 2013.

20 years ago

Gov. Arnold Schwarzenegger declared a state of emergency for the state's levee system following an aerial survey. The declaration sought to accelerate needed repairs at 24 critical sites.

30 years ago

An ACWA-sponsored workshop in Costa Mesa hosted Robert Poole, President of

the Reason Foundation, who delivered a keynote address about his organization's publishing a study arguing for the privatization of California's public water agencies.

40 years ago

ACWA's Board of Directors approved an association bylaw change that created a new special Groundwater Committee, charged with monitoring state and federal policy affecting groundwater quality and extraction.

50 years ago

State Sen. Peter H. Behr introduced SB 1482, a bill aimed at circumventing a U.S. District Court decision as well as popular electoral support of the New Melones Dam Project, as expressed by the defeat of Proposition 17 the previous year. Bill

sponsors acknowledged their intent was to prevent the building of New Melones Dam, which at that point had cost the U.S. Army Corps of Engineers nearly \$100 million. ♦

Workers build New Melones Dam in an undated photo. Fifty years ago, state legislation sought to stop the dam's construction, despite public support expressed by the defeat of a proposition.

Dry Conditions Reduce State's Snowpack Levels

The Department of Water Resources (DWR) on Jan. 30 conducted the second snow survey of the season at Phillips Station. The manual survey recorded 23 inches of snow depth and a snow water equivalent of 8 inches, which is 46% of average for the location. Statewide, the snowpack is 59% of average for this date.

Earlier in January, the snowpack was 89% of average after a series of atmospheric rivers provided relief from a slow start to the snowpack. A dry January, which is historically the wettest month of the year in California, has now eroded the gains made at the start of the year.

"After the storms at the start of the year gave way to warm, dry conditions, those early gains we saw have flatlined or slightly eroded," stated Andy Reising, Manager of DWR's Snow Survey's and Water Supply

Forecasting Unit, in a news release. "Recent California winters have seen this pattern of long, dry and warm stretches interrupted by intense storms. We are now two-thirds through what should be the best snow-producing months of the year. While there is still time for February and March to deliver additional snow, the farther into the season we get with below average conditions, the harder it will be to catch up."

While the state has experienced a recent dry spell, major reservoirs statewide are currently 126% of average thanks to recent precipitation on top of three consecutive years of above-average snowpack conditions.

In a Jan. 29 announcement, DWR cited storms in mid-December as making it possible for increasing the allocation to the

DWR staff members take measurements during the second snow survey of 2026.

Photo courtesy of DWR

State Water Project to 30% of requested supplies, up from the initial allocation of 10% on December

The next snow survey is tentatively scheduled for March 2. ♦

ACWA and Water Community Voice Support for HRL Program at State Water Board

ACWA staff and member agency representatives and organizations spoke in support of the Healthy Rivers and Landscapes (HRL) Program as the best pathway for updating the Bay-Delta Plan during a State Water Resources Control Board hearing Jan. 28-30.

Their public comments were the latest in ACWA's years-long effort through public testimony, comment letters and coalition building to support the HRL Program, formerly known as Voluntary Agreements.

The State Water Board is currently considering potential updates to the Sacramento River watershed, Delta eastside tributaries, and Delta portions of the Bay-Delta Plan. ACWA supports the HRL Program as the preferred pathway for

updating the Bay-Delta Plan as opposed to an approach based solely on a percentage of flows.

Speaking on Jan. 30, ACWA State Relations Advocate Stephen Pang thanked State Water Board members and staff for their work on updating the Bay-Delta Plan, and for allowing public comment during multiple hearings.

"Finally, we'd ask that the State Water Board do everything you can to advance and adopt the Sacramento-Delta update to the Bay-Delta Plan in a timely manner," Pang said. "Finalizing the update will deliver the ecological assets required to restore species and habitats that can't afford delay, while at the same time, providing the regulatory foundation

needed to sustain economic productivity, maintain affordability and protect public health."

ACWA also submitted written comments with technical feedback about the HRL Program's incorporation in the updated Bay-Delta Plan. ACWA was among several organizations speaking in support of the HRL Program, many of which highlighted the success of HRL programs already underway and producing results.

The State Water Board is expected to consider approval of the draft final Sacramento/Delta updates by the end of 2026. Additional information and background is available on ACWA's website at acwa.com/hrl-program. ♦

Valley County Water District *Celebrates 100 Years*

“

“Every improvement we have made is an investment in a future, where the district continues to deliver safe and reliable water.”

— General Manager Jose Martinez

What began in 1926 as the Baldwin Park County Water District, originally formed to meet the growing needs of a small agricultural community, has evolved into Valley County Water District (VCWD) – a modern, full-service public water provider known for its innovation, transparency and commitment to stewardship.

From its original handful of wells and pipelines, the district's water system has expanded to serve nearly 70,000 residents across a 10-square-mile service area that includes portions of Baldwin Park, Irwindale, West Covina and Azusa. VCWD continues to draw its primary water supply from the Main San Gabriel Groundwater Basin, which is an essential regional source that the district helps protect through responsible management and collaboration with neighboring agencies.

Building for the Future

"Every improvement we have made is an investment in a future, where the district

continues to deliver safe and reliable water," said General Manager Jose Martinez.

The district faced major challenges in the 1980s when industrial contamination affected local groundwater supplies. Multiple water treatment plants built as a result remain critical to regional remediation efforts.

VCWD's connection to the community includes robust outreach and educational programs. They have been honored for exemplary workforce safety standards, and are frequent presenters at regional, national and international water conferences. The district has a deep appreciation for its history, dedicated leadership, management team and employees who uphold the values of innovation and stewardship.

"Our next century begins now with a strong foundation built on trust, expertise and a shared commitment to the community we serve," said Board President David Muse. ♡

EXPLORING THE WATER WORLD ACROSS SOCIAL MEDIA

Part of the genius behind social media is getting to interact with your followers and customers in a relaxed setting. Finding engaging content that also educates and inspires can be difficult, but when you find something that works it can feel so good!

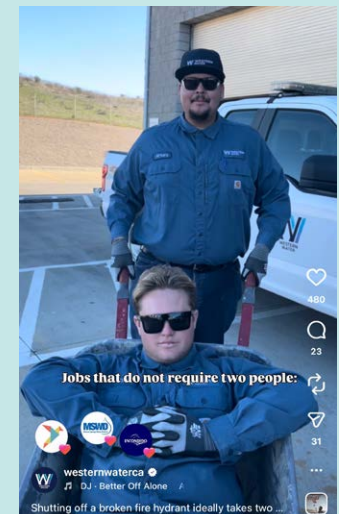

Below are great examples of Instagram content that encourages interaction.

Coachella Valley Water District (@cvwdh2o) shared some 'gram-worthy' photos of desert landscaping and asked followers to guess which one was an AI creation.

City of Sacramento Utilities (@sacdou) made important information entertaining and sharable by creating a reel of "5 ways to prepare for the storm" ahead of expected rain back in December.

Western Municipal Water District (@westernwaterca) capitalized on the success of a video of two Western Water team members shutting off a broken fire hydrant (that got 1.5 million views and 543 comments!) with a follow up video explaining why it takes two people to get the job done. They get bonus points for using the trend of showing off "jobs that do not require two people."

Check out these creative posts and get inspired to find ways to engage your followers.

ACWA highlights creative social media posts from member agencies so be sure to follow along (and tag us!) on Facebook, X, LinkedIn, YouTube and Instagram @ACWAWater.

Met Breaks Ground on LA Water Resilience Project

The Metropolitan Water District of Southern California in January broke ground on a \$280 million project to bring additional sources of water to Southern California communities hit particularly hard by the state's last drought.

The Sepulveda Feeder Pump Stations Project will allow Metropolitan to reverse flows in its system if needed during severe California droughts, pushing water from the Colorado River and Diamond Valley Lake into communities that currently have limited access to these resources. These areas normally rely almost exclusively on water from the northern Sierra, delivered through the State Water Project.

During the 2020-'22 drought, when California saw its three driest years on record and State Water Project deliveries were severely curtailed, these communities in Ventura County and Los Angeles County did not have sufficient water to meet normal demands. As a result, residents and businesses were required to dramatically reduce their water use.

"Metropolitan had never before imposed such strong reductions in water use on a portion of our service area. It was an unprecedented situation sparked by the hotter temperatures and more extreme droughts we are facing as the climate changes," stated Metropolitan

Map courtesy of Metropolitan

General Manager Shivaji Deshmukh in a Metropolitan news release. "When we saw the impacts of this historic drought on some portions of our service area, we committed to taking action to avoid this ever happening again."

The Sepulveda Feeder Pump Stations Project helps fulfill that commitment. It consists of building two new pump stations that, when needed, can push Colorado River water and water stored in Diamond Valley, into northern Los Angeles and southern Ventura counties,

reversing normal flows in the existing Sepulveda Feeder pipeline.

When the project is complete, expected in early 2029, Metropolitan will be able to deliver up to 22,000 acre-feet of additional water annually to the State Water Project-dependent area during severe droughts.

The pump stations are being constructed in a manner that will allow them to be readily expanded in the future depending on water supply conditions and future board approvals. ♦

Lower Yuba River Accord Extended Through 2050

The State Water Resources Control Board in January unanimously adopted an order extending its approval of the landmark Lower Yuba River Accord for another 25 years. Specifically, the Board approved Yuba Water Agency's petition for a long-term extension of the points of diversion and places of use associated with the Lower Yuba River Accord through 2050.

Since the mid-2000s, the Accord has advanced a broad suite of important benefits. They include the application of

science-based minimum instream flows to protect spring-run Chinook salmon and steelhead trout, using a flexible framework that adjusts based on annual hydrology. The Accord also integrates surface water and groundwater management.

The State Water Board's action followed the completion of a comprehensive environmental review and an evidentiary hearing by the State Water Board's Administrative Hearing Office.

"The Accord has served as a model for collaboration and partnership, which has resulted in improved conditions for fish and water security for the people of California. And, it's proof that when you sit down with people and focus on your common interests, you can accomplish really remarkable things," stated Yuba Water General Manager Willie Whittlesey in a news release. ♦

Member Agencies Name Board Officers

Beaumont-Cherry Valley WD

Lona Williams

The Beaumont-Cherry Valley Water District Board of Directors has approved officer assignments for 2026, naming **Lona Williams** as President and **Andy Ramirez** as Vice President. **David Hoffman** was appointed Secretary and **John Covington** will serve as Treasurer.

East Bay MUD

Luz Gómez

The East Bay Municipal Utility District Board of Directors has elected **Luz Gómez** as President and **Valerie Lewis** as Vice President.

Gómez was appointed to the Board in 2024 to replace former Director **John A. Coleman** after his resignation and then elected the same year, along with Lewis.

Marina Coast WD

Gail Morton

The Marina Coast Water District has elected **Gail Morton** as President and **Jan Shriner** as Vice President. Morton was first appointed to the Board in 2021 and elected the following year, serving as President during the past two years. Shriner was first elected to the Board in 2010, serving as President 2021-'23.

Mission Springs WD

The Mission Springs Water District recently announced the annual reorganization of its Board of Directors

Amber Duff

Moulton Niguel WD

Brian Probolsky

as Board President.

The Board also chose **Diane Rifkin** and **Richard S. Fiore** to serve as Board vice-presidents. In addition, **Brian Parker** was appointed to the Board by a unanimous vote.

Otay Water District

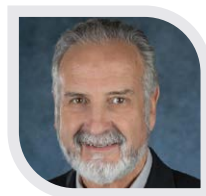

Francisco Rivera

The Otay Water District Board of Directors in January elected **Francisco X. Rivera** as President for 2026. The Board also elected **Mark Robak** as Vice President and **Delfina Gonzalez** as Treasurer.

Rivera was originally appointed to the Board in 2024.

Rowland WD

Anthony Lima

The Rowland Water District Board of Directors has selected **Anthony J. Lima** to serve as President. **Vanessa Hsu** will continue serving as Vice President.

for 2026, electing **Amber Duff** as President. **Robert Griffith** will continue serving as Vice President.

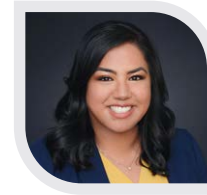

Santa Margarita WD

Laura Freese

Frank Ury as Vice President.

Upper Water

Dr. Katie Garcia

The Upper San Gabriel Valley Municipal Water District (Upper Water) has elected **Dr. Katarina "Katie" Garcia** as President. Garcia has served on the Board since 2020 and is the first Latina and Asian-Pacific Islander to serve as President in the district's history.

The Board also confirmed its 2026 officer slate, electing **Dr. Anthony R. Fellow** as Vice President, **Ed Chavez** as Treasurer and **Jennifer Santana** as Secretary.

Western Water

Laura Roughton

The Western Municipal Water District Board of Directors has confirmed the continuation of its current officers with **Laura Roughton** serving as President, **Fauzia Rizvi** as Vice President and **Brenda Dennstedt** as Secretary/Treasurer. ♦

Tom Barcellos

Barcellos Appointed to USDA Committee

The U.S. Department of Agriculture's Farm Service Agency has appointed **Tom Barcellos**, President of the Lower Tule River Irrigation District, as Chair of the California USDA Farm Service Agency (FSA) state committee.

Barcellos, from Porterville, was among five agricultural leaders appointed to the FSA state committee by USDA Secretary of Agriculture

Brooke L. Rollins. He is a member of ACWA's Region 7 Board, owns diversified crop and dairy enterprises and has held multiple leadership roles on numerous agricultural boards.

Rollins appoints members of the FSA state committee, which is responsible for the oversight of farm programs and county committee operations, resolving program delivery appeals from the agriculture community, maintaining cooperative relations with industry stakeholders and keeping producers informed about current FSA programs. ♦

Johnny Amaral

Friant Water Authority Names Amaral as CEO

Friant Water Authority (FWA) in January appointed **Johnny Amaral** as CEO, replacing **Jason Phillips**, who left FWA last November to pursue a leadership role in the private sector.

Amaral originally joined FWA in 2019 as Chief of External Affairs and was appointed Chief Operating Officer in early 2022. As CEO, he will focus on

protecting the Friant water supply, safeguarding critical infrastructure such as the Friant-Kern Canal and strengthening trusted partnerships across the region.

Prior to joining FWA, Amaral served as Deputy General Manager for External Affairs at Westlands Water District and began his career in public service as Chief of Staff to U.S. Rep. **Devin Nunes**, where he worked on water and public policy matters for more than 13 years. ♦

Jorianne Jernberg

SMWD Names Jernberg Deputy GM

Santa Margarita Water District (SMWD) has named **Jorianne Jernberg** as Deputy General Manager.

She brings more than a decade of leadership in water and infrastructure finance, most recently from Washington, D.C., where she served as a

Division Director of the U.S. Environmental Protection Agency's Water Infrastructure Finance and Innovation Act, or WIFIA, program.

Jernberg's work spans water reuse, desalination, stormwater and wastewater improvements. Prior to her role with the EPA, she spent a decade in the transportation sector, focusing on infrastructure finance. ♦
